

Let's build together the future of RFID

Become a Partner

AXEM Technology, RFID leader since 2003.

In 20 years, we have acquired a strong knowledge of the RFID market and the issues of identification and tracking in industrial environments. Our **standard products** and our wide range of services meet the needs of industrial sectors: construction, laundry, defence, energy, logistics...

We also design customised products. Innovation has always and increasingly been at the core of our business.

In 2018, in response to growing demand, we created our innovation centre, the AXEM Lab. The aim is to manufacture the RFID tags and readers of tomorrow.

“ Becoming AXEM partner is a human and technological adventure, it is the union of forces and skills at the service of tomorrow's RFID. ”

Cynthia Loup
Marketing & Communication Manager

We are looking for partners to share our ambition

We benefit from a strong growth of our business and customers in France and internationally. We are strengthening our network of partners and integrators worldwide.

Are you looking for **technical skills** in RFID, **quality products** and **ambition** ? **Let's get in contact!**

What are the benefits?

By joining our network of partners, you will benefit from multiple advantages:

- + **Save time** by accessing to a wide range of high and constant quality products, with a selection of products designed and made in France.
- + **Be flexible** in using various services for readers and identifiers.
- + **Save money** by getting significant discounts on products' prices.
- + **Gain trust** thanks to a team of experts and reactive after-sales services.
- + **Optimize your pre-sales** with Marketing support.
- + **Have pleasure to work** with a people-oriented company.

We already work together

“ We are honoured to work with AXEM, we have appreciated in recent years the technological competence of the support team. They are not box movers, thanks to them we have been able to meet the expectations of a very demanding customer in a harsh environment such as a foundry. AXEM tags have brilliantly passed all tests resulting in very high performance and reliability. ”

Luca Defend,
Business Development Manager at TechSigno
