AX'Lin Classic fixing

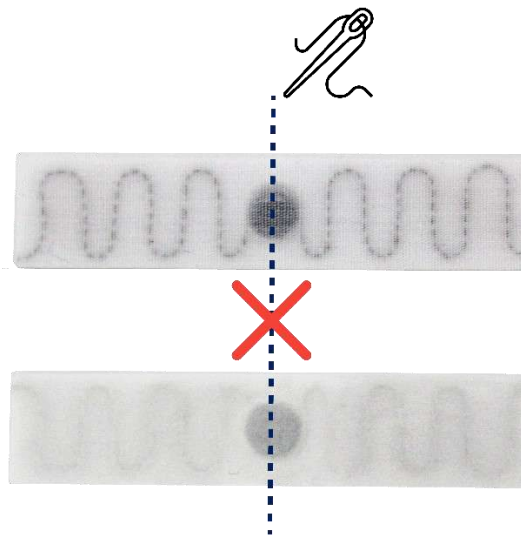

How to sew the AX'Lin Classic

AX'Lin Classic is a laundry RFID tag that can be sewn into the hem of a textile.

Before sewing the tag, the linen to be marked must be clean and dry.

In order to ensure the best reading performance of the tag it is recommended to follow the following instructions:

- Do not sew on the antenna.
- Do not sew the tag on a fold line of the linen.
- The seams should never go through the center, over the RFID chip.

The AX'Lin Classic should be sewn on two sides thanks to two sewing lines as shown below:
