

Evaluate the lifespan of your tags!

PACKAGE

Tests up to
10 tags

RFID performance tests

- Precise evaluation of the functionality and performance of your tags in our RFID laboratory, AXEM Lab,
- Study of the sensitivity of the signal of your tags according to various factors (sensitivity, radiation diagram...).

Customer benefits

- Save time and money by better understanding how the tag works in its application,
- Get feedback from RFID experts on the performance of your tags in the most critical applications,
- Evaluate the ROI by having a precise idea of the lifespan of your tags.

Go to
www.axemtec.com
to view our tags.

**tests of more than 10 tags on demand*

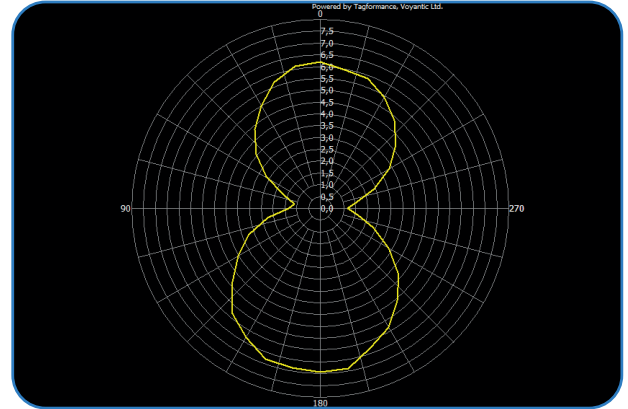

V1.1
Non contractual document

Performance measure

1

- Analysis of the frequency response and radiation diagram of the tags recommended by AXEM Technology according to the customer application.
- Sending of the sample tags to be processed by the customer.

Receipt of the tags at the customer's premises

2

- Tests of the tags over time and in real conditions.
- Sending the tags to AXEM Technology's RFID laboratory for further post-process analysis.

Analysis of customer return tags in the laboratory

3

- New analysis at AXEM Technology and performance comparison.
- Final performance report sent to customer.
